EDUCATION

Shri Vishnu Engineering College For Women

Bhimavaram, India

Bachelor of Technology in Artificial Intelligence and Machine Learning

CGPA: 8.63/10.00

SKILLS

Languages: Python, Java
Frontend: React.js, HTML, CSS, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Databases: MongoDB Atlas, MySQL
Machine Learning: Pandas, NumPy, Scikit-learn, EDA, Data Preprocessing, Feature Engineering
Tools: Git, GitHub, VS Code, Streamlit, Vercel, Google Colab
Core CS: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

Bike Sharing Demand Prediction System

Live — Repository

Tech Stack: Python, Pandas, NumPy, Scikit-learn, Streamlit

- Developed an end-to-end machine learning application to predict hourly bike rental demand using historical, weather, and seasonal data.
- Performed data preprocessing, feature engineering, and model evaluation using **R²** and **RMSE** to identify the best-performing regression model.
- Built and deployed an interactive **Streamlit** dashboard that enables users to input real-time parameters and visualize demand predictions.

Personal Portfolio Website

Live — Code

Tech Stack: React.js, Tailwind CSS, JavaScript, Vercel

- Designed and developed a responsive portfolio website to showcase technical projects, skills, certifications, and coding profiles.
- Implemented reusable React components, smooth navigation, animations, and a modern UI to improve user experience across desktop and mobile devices.
- Deployed the application on **Vercel** with optimized performance and integrated links to GitHub, LinkedIn, and project repositories.

Smart Invigilation Management System

Live — Repository

Tech Stack: React.js, Tailwind CSS, Redux Toolkit, Node.js, Express.js, MongoDB Atlas, JWT

- Developed a full-stack web application to automate examination invigilation scheduling, reducing manual effort and preventing scheduling conflicts.
- Implemented secure JWT-based role authentication for Admin, HOD, and Teacher modules with features for teacher, department, room, exam, and leave management.
- Built a workload-balancing invigilation allocation algorithm that considers teacher availability, leave requests, room capacity, and session preferences to generate conflict-free duty assignments.

EXPERIENCE

Infosys Virtual Internship

Oct 2025 – Dec 2025

Data Science Intern

- Built a machine learning model to predict used bike prices using Python and Scikit-learn.
- Performed data cleaning, exploratory data analysis (EDA), feature engineering, and model training on real-world datasets.
- Evaluated regression models using performance metrics and identified the best-performing model for price prediction.

ACHIEVEMENTS & CERTIFICATIONS

- LeetCode:** Peak Rating 1567 — Solved 350+ Problems — 100 Days Badge
- HackerRank:** 5★ in Problem Solving, Python, and Java
- Certifications:** Infosys (Java), Deloitte (Data Analytics), HackerRank (Python Basics), Cisco (Network Essentials, Cybersecurity)
